

In the Specification:

On page 7, please replace the paragraph beginning on line 7 and ending on line 17 with the following amended paragraph:

FIG. 2 is a schematic of a color field sequential projector including two electronically controllable quarter waveplates. In particular, projector system 50 comprises many of the same components as system 10 illustrated in FIG. 1, with the addition of a second LCD device 52, and a second electronically controllable quarter waveplate 54 positioned between prism 12 and reflection device 52. In the embodiment shown as projection system 50, color switch 28 may act to provide distinct colorbands simultaneously to each of LCD devices 32 and 52, so as to provide two distinct colorbands simultaneously to projection device 40, as described in a patent application Serial No. 10/022,768, filed December 13, 2001, entitled "Two-Panel Reflective Liquid Crystal Display Projection System and Method of Using the Same," ~~filed on~~ _____, ~~in the name of the same inventor, wherein~~ invented by James M. Florence, said patent application ~~is hereby~~ being incorporated by reference herein.
